

Rotary Arm

KPS' high throughput rotary arm stretch system can handle a variety of different dimensions and unlimited weight.

As an end-of-line material handling solution, we will discuss your particular needs, and design and build a standard or customized wrapper to meet them.

PERFORMANCE:

- 90 second cycle time or less depending on wraps
- 4,000 lb standard weight capacity
- Higher weight capacity available up to 30,000 lbs

COMPONENTS:

- All Allen Bradley components:
 - Allen Bradley 7" HMI Screen
 - Allen Bradley PLC controls all wrap functions
 - Allen Bradley AC Drives
- Banner or AB safety components

FILM DELIVERY:

- 20" standard, 30" optional
- Pre-stretch
- Automatic roping optional

CONSTRUCTION:

- Fabricated & manufactured in the United States
- Frame structural tube, plate and bar meet ASTM-A36 or ASTM-A500
- Powder coat finish standard
- Stainless steel optional
- Fork lift portability

CONVEYORS:

- Gravity conveyors
- Powered conveyors
- Pop-up conveyors
- A broad selection of custom conveyors are available

ADDITIONAL OPTIONS:

- Safety package upgrade
- Stainless steel & washdown
- Air conditioning or heating unit
- Scale
- Printer & labeler
- Scanner
- Fork truck stops
- Key fob remote
- Nema 12 cabinet enclosure
