

Custom Material Handling & Conveyance

Kalpakk industrial conveyor systems are custom designed to streamline material handling processes, reduce downtime, and enhance operational efficiency for a wide range of industrial applications. Built to withstand the toughest environments, they deliver exceptional performance.

UPENDERS

Kalpakk systems can upend inline and or palletize products before upending. 30,000 lb+ possible.

TURNTABLES

Kalpakk builds custom high weight or large capacity turntables.

LIFT TABLES

Automation in end of line material handling reduces workplace accidents from repetitive or heavy lifting.

ROLLER, BELTED, OR CHAIN CONVEYORS

Whether your application requires belted, chain, or roller conveyors, Kalpakk can source or build these solutions for you.

THROUGHPUT

Move more product out the door faster, reducing bottlenecks in your main production.

APPLICATIONS

- Parcels & Packages
- Pallets
- Windows & doors panels
- Concrete & other blocks
- Rolls & coils
- Boxes
- Corrugated

All applications can be built in custom dimensions to meet any of a variety of conveyance needs.

CUSTOMIZABLE CONVEYANCE

- Belted
- Modular
- Highspeed
- Roller
- Washdown
- Chain transfer
- Popup
- Multi-feed
- Quarry & concrete
- Small parts
